

COP22 Event programme

Water, a connector for successful NDC implementation

Date: 17 November • **Time:** 15:00-16:30 • **Venue:** Mediterranean (300) - Side Events & Exhibits Hall

Water is a connector, not a sector, and it provides solutions.

The water community offers holistic expertise that can support strategies to tackle climate change and facilitate adaptation. However, to meet the climate challenge we must strengthen multi-stakeholder collaboration across all sectors. Water connects policy areas, economic sectors, and societies and is therefore a tool for strengthening partnerships and building trust.

In this session we aim to explore how the unique, collaborative effect of water can be utilized and built upon to strengthen relationships between ministries, decision-makers, practi-

tioners and non-state actors to support the achievement of NDCs and the ambitions of the Paris Agreement.

We will advance the dialogue on the role of water resilience in achieving NDC implementation and how to enhance climate-resilient investment in water. We will also showcase opportunities and challenges for implementation of national climate plans, accessing climate finance and utilizing the support

Organizers: SIWI, AGWA, GWP, REC

Water, a connector for successful NDC implementation

Date and time | 17 November | 15:00-16:30

Place | Mediterranean (300) - Side Events & Exhibits Hall

Convenors | Stockholm International Water Institute (SIWI), Global Water Partnership (GWP), Regional Environmental Center (REC) and Alliance for Global Water Adaptation (AGWA)

Program

15.00 **Introductions**

Karin Lexén (Moderator), Director, World Water Week and International Policy, SIWI and Co-Chair of AGWA

Marta Szigeti Bonifert, Executive Director, Regional Environmental Center

15.10 **Panel discussion 1: Initiatives and tools on water management contributing to the implementation of the NDCs and NAPs**
